# Stopping Adult Abuse is Everyone's Business

**A**dult Protective Services (APS) investigates allegations of abuse, neglect and financial exploitation of adults with disabilities or who are 65 or older. When APS confirms an allegation, it arranges services to try to address the problem.

Many older people and those with disabilities live alone or depend on others for care. This can put them at risk for abuse, neglect, and financial exploitation.

More than half of all cases reported to APS involve neglect. Most of those are self-neglect. Aging adults or those with disabilities may no longer be able to provide for their own health and safety. They may live in unsanitary conditions, without heat or running water, or may need some help with meals or other daily activities. They may also lack the medical care they need.

Short-term help with shelter, home repairs, food, transportation, managing money, medical care, home healthcare, and mental health care are available.

You can be their champion by recognizing and reporting any mistreatment. Their welfare is everyone's business.
